

## Commercial U-Leg Perforated Metal Park Bench

SKU:

---

4' CF-FRDVX      6' CF-NH0SG

8' CF-5XPUI

### Thermoplastic Coating

Our outdoor furniture is covered in a copolymer-based thermoplastic powder coating. Thermoplastic is environmentally safe, the coating will never fade, crack, peel, warp, or discolor for the life of the product. Thermoplastic has the best adhesion rate of any other process. This keeps the metal base free of any corrosion possibilities. Thermoplastic is applied at a thickness of 25-30 mils. This allows maximum protection with the best possible surface. Thermoplastic can be easily repaired. Cuts are repaired by heating the affected area with an industrial heat gun. The thermoplastic will rebind itself. The properties of thermoplastic also make spray painting difficult for vandals. Simply wash product with a standard industrial cleaner.

### Specifications

#### General

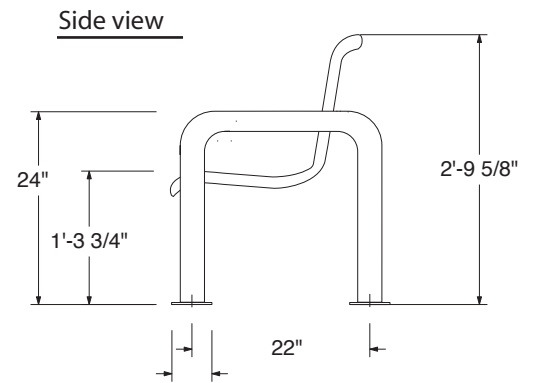

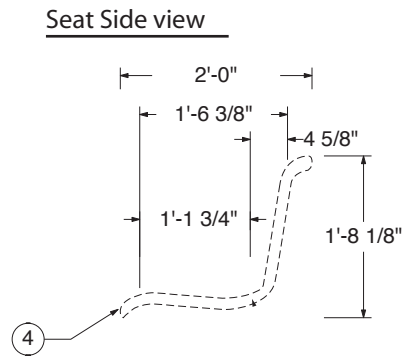

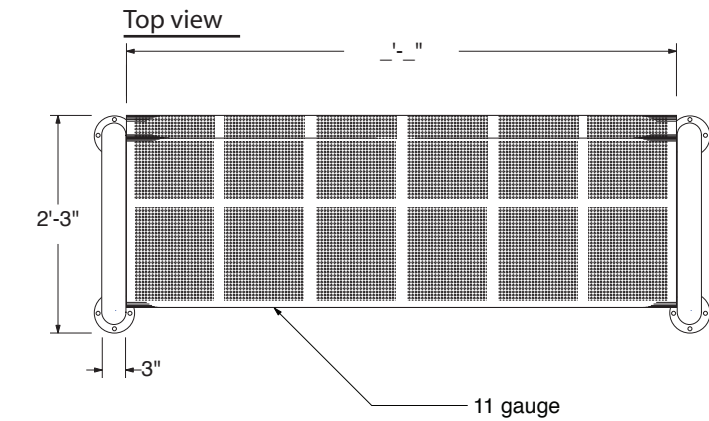

All of the listed products above are protected with Thermoplastic coating. Predrilled holes for surface mounting. Cast iron legs. Signature series customized benches have four optional areas for text and graphics.

Check for any damaged or missing parts of if you have problems assembling your furniture / equipment please call our Customer Service Representatives.
